To all Australian Equestrian Organisations

We, the undersigned, respectfully ask that the crossover design of bitless bridle known as The Bitless Bridle ™ be legalised for all forms of equestrian competition, on the grounds that it is a safe, effective and humane alternative to all forms of bitted and other designs of bitless bridles (eg., hackamore, bosal, sidepull). This has been proven by the research of Dr WR Cook FRCVSc PhD, Professor Emeritus at Tufts University, School of Veterinary Medicine, Massachusetts USA and has been borne out by testimonials from riders of all disciplines from all over the world.

(For research and testimonials, see www.bitlessbridle.com).
